Miss. Shreepi Jha
Class - VIII - I

☆ I don't know what to tell ☆

I don't know what to tell;
because corona is still a hell,
children's laugh and play,
are under lockdown way.

Corona is the worst disease;
stay at home everyone please,
online classes makes blinking our eyes,
children are saying schools are more nice.

Corona is a serious situation;
because it a devastation,
I don't know what to tell,
because corona is still a hell.

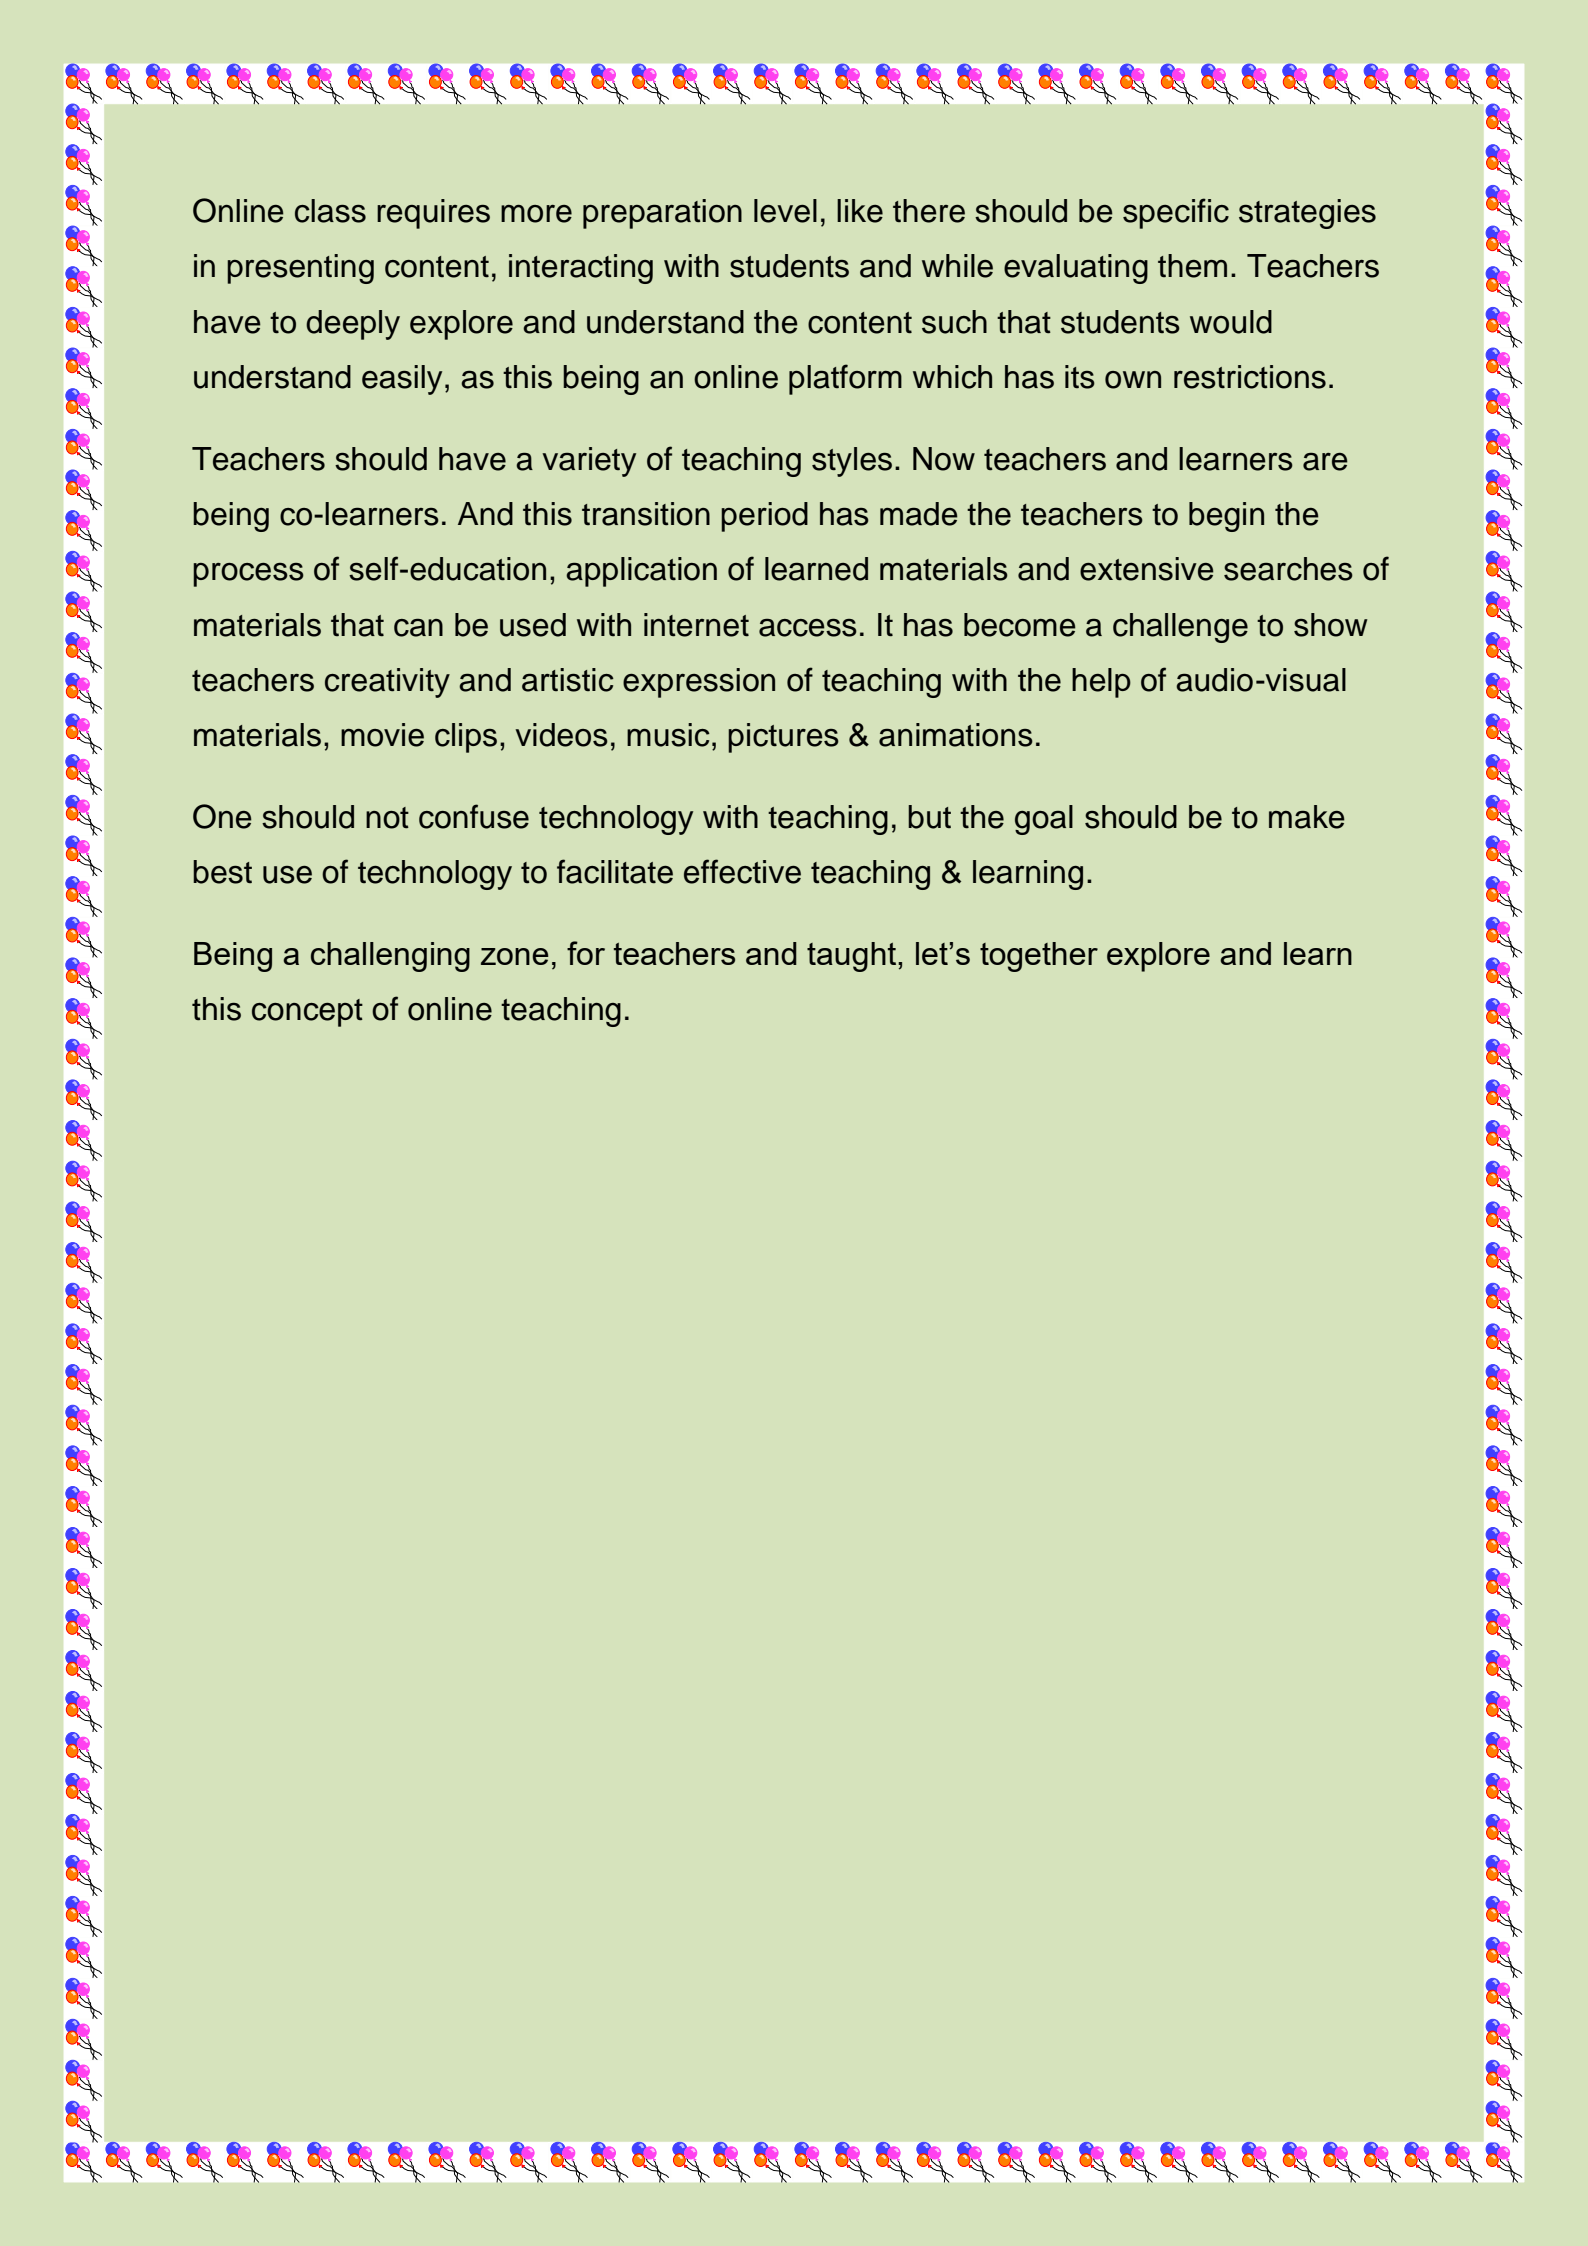

Ms. Signa Vinod
Pre Primary Section

Transition of Classroom Teaching to Online

There is a saying that one should change with time. It is known to everyone about the pandemic situation which brought a big change in teaching field.

We all know that a classroom is a traditional teaching style in which students sit in a room and listen to a teacher with face to face interactions.

An Online teaching is taken through a web-based learning platform using interactive teaching strategies.

A decorative border of colorful balloons in shades of blue, pink, orange, and purple, arranged in a repeating pattern around the perimeter of the page.

Online class requires more preparation level, like there should be specific strategies in presenting content, interacting with students and while evaluating them. Teachers have to deeply explore and understand the content such that students would understand easily, as this being an online platform which has its own restrictions.

Teachers should have a variety of teaching styles. Now teachers and learners are being co-learners. And this transition period has made the teachers to begin the process of self-education, application of learned materials and extensive searches of materials that can be used with internet access. It has become a challenge to show teachers creativity and artistic expression of teaching with the help of audio-visual materials, movie clips, videos, music, pictures & animations.

One should not confuse technology with teaching, but the goal should be to make best use of technology to facilitate effective teaching & learning.

Being a challenging zone, for teachers and taught, let's together explore and learn this concept of online teaching.
